PAT Testing C & G 2377-22

Introduction

The City and Guilds 2377-22 provides a level 3 qualification for in service inspection and testing of electrical equipment (PAT).

It is important that candidates should be familiar with electrical systems and the hazards of electricity. Anyone without a formal pre-existing qualification, such as the Level 3 Electro Technical NVQ, must be able to demonstrate adequate prior knowledge and experience to ensure they have the potential to successfully gain the qualification.

The City and Guilds 2377-32 Management Requirements for the Maintenance of Electrical Equipment may also be taken - please specify when you book the course.

Objective

To achieve the City and Guilds 2377-22 Level 3 In-Service Inspection and Testing of Electrical Equipment (PAT Testing)

or

To achieve the City and Guilds 2377-32 Level 3 Management Requirements for the Maintenance of electrical Equipment.

Methodology

A mixture of presentations and discussion sessions will be reinforced by practical work to ensure candidates receive the necessary underpinning knowledge and practical skills.

The assessment for the 2377-22 is by means of a practical test and an on-line multiple choice question paper.

The assessment for the 2377-32 is one on-line theory test.
